Figure 10. Timed Stereotypies Rating Scale Although this rating scale can be used with a stopwatch, it is best used with a recording of a 30-second interval timing (up to 10 min), which is available in MP3 format. (Windows Media Player supports this format; MAC users can download an MP3 player here.) Please download this MP3 audio file and dub it to a recording device (eg, tape recorder) via the computer's audio output jack to create a copy to use when administering the Timed Stereotypies Rating Scale. Printer-friendly version of Figure 10 (PDF)

Adobe Acrobat Reader (stand-alone) or Viewer (browser-integrated JAVA plug-in) is required to view this document. To obtain these products for free, please visit http://www.adobe.com/support/downloads/main.html

Rater:			
Name:			
Date:			
Time:			

Place: Instructions: Please place a check mark in the appropriate box the first time the indicated stereotypy occurs during each thirty-second interval. Additional lines for other stereotypies may be added at the bottom of the form. Please write a description of each other stereotypy.

Stereotypy	0:00	0:30	1:00	1:30	2:00	2:30	3:00	3:30	4:00	4:30	5:00	5:30	6:00	6:30	7:00	7:30	8:00	8:30	9:00	9:30	Total
