Chart Review Worksheet Instructions

- To complete this chart review, please select 10 patient charts that meet the following criteria:
  - 18 years old and older
  - Diagnosis of RA

- Return to the PI CME online chart review forms at www.medscape.org/picme/start/104 to enter the information from each worksheet.
Chart Review

Patient 1 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - Yes
   - No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - Yes/Not scheduled to start biologic DMARD
   - No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - Yes
   - No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - Yes
   - No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - Yes
   - No

6. Has this patient been assessed for glucocorticoid use?
   - Yes
   - No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   - No
## Chart Review

### Patient 2 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - [ ] Yes
   - [ ] No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - [ ] Yes/Not scheduled to start biologic DMARD
   - [ ] No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - [ ] Yes
   - [ ] No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - [ ] Yes
   - [ ] No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - [ ] Yes
   - [ ] No

6. Has this patient been assessed for glucocorticoid use?
   - [ ] Yes
   - [ ] No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - [ ] Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   - [ ] No
### Chart Review

#### Patient 3 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - [ ] Yes
   - [ ] No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - [ ] Yes/Not scheduled to start biologic DMARD
   - [ ] No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - [ ] Yes
   - [ ] No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - [ ] Yes
   - [ ] No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - [ ] Yes
   - [ ] No

6. Has this patient been assessed for glucocorticoid use?
   - [ ] Yes
   - [ ] No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - [ ] Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   - [ ] No
# Chart Review

**Patient 4 of 10**

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - Yes
   - No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - Yes/Not scheduled to start biologic DMARD
   - No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - Yes
   - No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - Yes
   - No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - Yes
   - No

6. Has this patient been assessed for glucocorticoid use?
   - Yes
   - No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   - No

Chart Review

Patient 5 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - Yes
   - No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - Yes/Not scheduled to start biologic DMARD
   - No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - Yes
   - No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - Yes
   - No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - Yes
   - No

6. Has this patient been assessed for glucocorticoid use?
   - Yes
   - No

7. If the patient is receiving prolonged doses of prednisone $\geq 10$ mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - Yes/or the patient is not on prolonged doses of prednisone $\geq 10$ mg daily (or equivalent)
   - No
Chart Review

Patient 6 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   - Yes
   - No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   - Yes/Not scheduled to start biologic DMARD
   - No

3. Has this patient had an assessment of disease activity within the past 12 months?
   - Yes
   - No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   - Yes
   - No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   - Yes
   - No

6. Has this patient been assessed for glucocorticoid use?
   - Yes
   - No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   - Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   - No
Chart Review

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   □ Yes
   □ No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   □ Yes/Not scheduled to start biologic DMARD
   □ No

3. Has this patient had an assessment of disease activity within the past 12 months?
   □ Yes
   □ No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   □ Yes
   □ No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   □ Yes
   □ No

6. Has this patient been assessed for glucocorticoid use?
   □ Yes
   □ No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   □ Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   □ No
Chart Review

Patient 8 of 10

1. Has this patient received at least 1 ambulatory prescription for a DMARD since their diagnosis with RA?
   ☐ Yes
   ☐ No

2. Does this patient have documentation of a TB screening performed and results interpreted within 6 months prior to receiving their first course of therapy with a biologic DMARD?
   ☐ Yes/Not scheduled to start biologic DMARD
   ☐ No

3. Has this patient had an assessment of disease activity within the past 12 months?
   ☐ Yes
   ☐ No

4. Has this patient had a functional status assessment performed at least once within the past 12 months?
   ☐ Yes
   ☐ No

5. Has this patient had assessment and classification of disease prognosis at least once within 12 months?
   ☐ Yes
   ☐ No

6. Has this patient been assessed for glucocorticoid use?
   ☐ Yes
   ☐ No

7. If the patient is receiving prolonged doses of prednisone ≥ 10 mg daily (or equivalent) with improvement or no change in disease activity, has a glucocorticoid management plan been documented within the past 12 months?
   ☐ Yes/or the patient is not on prolonged doses of prednisone ≥ 10 mg daily (or equivalent)
   ☐ No
